github.com/pembattech

Dedicated web developer with a strong background in Django, PHP, and Laravel, eager to enhance skills. Enthusiastic about creative projects and keen to collaborate in dynamic teams. Seeking a responsible career opportunity to fully utilize my training and make a significant contribution to company success.

Education

BACHELOR IN COMPUTER APPLICATION | TRITON INTERNATIONAL COLLEGE
04/2020 - Present

Tech Stack

- **Languages**: Python, PHP, Html, CSS, JavaScript
- **Backend Framework:** Django, Laravel
- **Database:** Postgres, MySQL
- **Other:** Vercel

Things I've Worked On

Pen and Page | penandpage-pemba.vercel.app

A blog website using Django REST Framework (DRF) authentication.

Book a Room | bookaroom-pemba.vercel.app

A web application that integrates authentication, hotel management, and reservation features via API. It serves individual and corporate clients, offering a seamless platform for exploring, booking, and managing hotel stays.

TeamTrack | github.com/pembattech/team-track

A project management tool built in PHP for my college project defense.

ConnectHive | github.com/pembattech/connect-hive

Connect-Hive is a Laravel-powered social network that allows users to share posts, images, and interact with content. It features user authentication, profile management, group creation, and real-time chat for a dynamic social experience.
